

**On November 14th, 2001, Hewlett-Packard announced the End of Life date for the HP 3000 (MPE/iX) platform.**

How will this affect you:?

- After December 31, 2006, your MPE/iX hardware and software will no longer be supported by HP.
- Your employees and the vendors who develop and support your applications and tools may eventually go away.
- Hewlett-Packard is advising HP e3000 customers to begin evaluating and planning transitions to other... platforms.

**Pro 3K** is here to help.

## Pro 3K

**Pro 3K** has been faithfully serving the HP 3000 community since 1988.

Our company is based in Inver Grove Heights, Minnesota, but our clients are located throughout the United States.

We are expert in all aspects of HP 3000 systems. We also are proficient with HP-UX, Windows, LINUX and IBM AS 400/iSeries,

Although we have earned multiple HP certifications and are in HP's Developer & Solutions Partner program, we are not part of HP.

Our skills along with years of experience with system administration and application development make us uniquely able to help your company deal with **Hewlett-Packard's announcement about the End of Life dates for the HP 3000.**

Whether you choose to homestead, re-write, or migrate your applications... Pro 3K has the experience and expertise you need to navigate HP 3000 end-of-life issues from start to finish.

If you chose to homestead, **Pro 3K** can assist you by setting up redundant systems.

Our team can help you put together the resources necessary to handle any size migration effort.

We can ease your worries about the possible need to RESTORE and access TurboIMAGE databases from archival backups long after your system is gone.

We can help you scrub your old system clean, leaving no trace of your confidential intellectual property.

And since we don't buy or sell hardware, in an unbiased manner, **Pro 3K** can help you dispose of your old HP 3000 hardware. (If you've truly loved MPE (the way we have) you may feel good knowing that your old system is being put to good use.)

Even if you've already chosen a plan, a platform and have a clear road ahead call us for a free consultation.
